Lam is an "Extra-

Terrestial" Intelligence with whom Aleister Crowley entered into contact in 1919 e.v. It was during that year that Crowley

executed and exhibited the drawing of Lam in Greenwich Village, New York.

Work with Lam and other supra-

human Intelligences has a its consequence

the widening and deepending of human consciousness, and the pen etration

of awareness into other dimensions. Each magician who works on self-realisation

becomes both a focus of energy on earth and a projection of a s tar in space.
