

Lonely Eyes

Bellamy Brothers

Daylight comes crashing through
It shakes you up, it brings you to
And it can bring you down
We traded some innocent lies
But it still hurts when you realise
It wasn't love we found
It really wasn't love we found

And lonely eyes only see what they're crying for
And lonely eyes only see what they want to see
You look so long, you look so hard, but night is a blinding disguise
So sometimes it looks like love through lonely eyes

Darkness can do you harm
Your heart is dying, keep it warm
Don't let it turn to stone
Searching, when will it end
You reach out, you just can't spend
Another night alone
Not one more lonely night alone

And lonely eyes only see what they're crying for
And lonely eyes only see what they want to see
You look so long, you look so hard, but night is a blinding disguise
So sometimes it looks like love through lonely eyes

Ooh, you're some kind of lady
Ooh, come see me again
You know we're friends
Girl, you know we're friends

And lonely eyes only see what they're crying for
And lonely eyes only see what they want to see
You look so long, you look so hard, but night is a blinding disguise
So sometimes it looks like love through lonely eyes

And lonely eyes only see what they're crying for
And lonely eyes only see what they want to see
You look so long, you look so hard, but night is a blinding disguise
So sometimes it looks like love through lonely eyes
