

Aliengirl

Ben Cristovao

A little ...

I have gone astray a long time looking for you,
your smile, I have gone astray and I hope that
me see you again you are my royal blue supernova.

And with each passing moment somewhere in my head is growing suspicion,
that I know you.

Devices crazy,
the way you look is playfully tell me the truth,
whether I am clear.

You flying around Mars,
wake up to Venus,
space is diminished and your heart pounds,
You know as well as I can not continue without me.
You are my alien,
you are my Martian,
You wonder, wonder what I'm looking for years.
You else from the world and this planet
is a place, a place where you do not want to be.

Good luck trying, by around
rollin your star, I know that I can not,
you're afraid of human bait,
afraid that at your overnight stay.

And with each passing moment somewhere in my head is growing suspicion,
even those that know me.
Extremely you're wrong if you think that just
I am the one who is afraid of you.

You flying around Mars,
wake up to Venus,
space is diminished and your heart pounds,
You know as well as I can not continue without me.
You are my alien,
you are my Martian,
You wonder, wonder what I'm looking for years.
You else from the world and this planet
is a place, a place where you do not want to be.

My alpha beta you from the word sentence
and the first book of what I like to read.
(What you're like a book I enjoy reading)
You're like a comet to teach me to fly
and show us the direction I let vista.
(Show us the direction I let vista)
- You're like a book what I like to read
Show me the direction I'll be guided -

You flying around Mars,
wake up to Venus,
space is diminished and your heart pounds,
You know as well as I can not continue without me.
You are my alien,
you are my Martian,
You wonder, wonder what I'm looking for years.

You else from the world and this planet
is a place, a place where you do not want to be.

You flying around Mars,
wake up to Venus,
space is diminished and your heart pounds,
You know as well as I can not continue without me.
You are my alien,
you are my Martian,
You wonder, wonder what I'm looking for years.
You else from the world and this planet
is a place, a place where you do not want to be.
