

What's Good Is Good

Ben Lee

We're living in a funny time
Without a reason or a rhyme
They say it's only in your mind
If you say what's good is good

Change is coming to this town
And everybody is looking 'round
I prefer to stand in solid ground
And say what's good is good

What's good is good
What's good is good
Deep inside nobody can deny what's good is good

I don't believe in building dreams
Out of fashion magazines
So I'm swimming up against the stream
But I know what's good is good

I don't want to spend my life
Arguing about what is right
So I made sure I picked a wife
Who believes what's good is good

What's good is good
What's good is good
Deep inside nobody can deny what's good is good

I guess you gotta pick a side
Don't waste your time asking why
It's either true or it's a lie
And the truth is what's good is good

So stand up tall and plant your feet
In perennial philosophy
The truth lives in eternity
And the truth is what's good is good

What's good is good
What's good is good
Deep inside nobody can deny what's good
And the lie says you shouldn't even try
What's good
But inside nobody can deny
What's good is good
