

## White Lines & Red Lights

### Between the Trees

Late night, driving home together  
And at red lights we press our lips together  
And we're holding tight now  
Slow it down now  
Let's take our time  
Let the moment last  
Until it feels right  
Holding back  
And not getting too carried away  
Let the music fade

'cause you are the brightest star  
I'm in love with who you are  
And you are the brightest star  
I'm lost without your love

We are in each other's arms  
Just like a movie scene  
Cause as we're leaning in  
The light decides to turn green  
Me and you together  
This is getting better  
Just butterflies won't do  
I don't want just red lights  
I want more of these nights  
Baby, I love you

'cause you are the brightest star  
I'm in love with who you are  
And you are the brightest star  
I'm lost without your love

Cause you are the brightest star  
I'm in love with who

Me and you is what matters most  
It's not the intimacy that brings me  
Closer to you...
