

Everybody's Breakin' Up

Billy Paul

Everybody's breakin' up
Let's stay together
Let's stay together

Everybody's breakin' up
Let's stay together
Let's stay together

I know they're our friends
And their love is at its end
But don't let it affect the way we feel about each other
No, don't you let it happen to you, girl
No, not you and me
We could never be
Like any other love you've known before
Because you and I, we know, we know, we know
We know so much more

It's about time for us to respect each other
And love each other
All you gotta do is give a little, take a little
That's the only way that things can work out

Everybody's breakin' up
Let's stay together
Closer than ever

She calls you everyday
When I'm gone away
Talkin' about how wrong she's been treated
That kind of love she never needed
Oh but you got to throw it out, girl
Don't let us get involved
Their problems we can't solve
We got enough holdin' on to this precious love we got
Don't you know misery loves company

So very very good to respect each other
And love each other
All you gotta do is give a little, take a little
That's the only way this situation can work out

Everybody's breakin' up
Let's stay together
Stronger than ever

You know, when you go away
Women are like... have a tendency to play
And the one be call up the other
But they're so up on everything
And I tell my woman

No, we can't get involved
Their problems we can't solve
We got enough holdin' on to this precious love we got
Don't you know misery loves company

Come everyday to respect each other
And love each other
All you gotta do is give a little, take a little
That's the only way that things can work out

Everybody's breakin' up
Let's stay together
Longer than they

Everybody's breakin' up
Let's stay together

Everybody's breakin' up
Let's stay together

Everybody's breakin' up
Let's stay together...
