

Who knows what a love can do

Billy Squier

It's a wrong side of town kinda love
We let ourselves get into
People try to change this world
Around me and you

We gotta try, try a bit harder
If what they say is true
And who knows what a love can do

Who knows what a love can do
Who knows what a love can do

Now we're left standing here all alone
Outside lookin' in
And I can tell from the things I see it's no way to begin
But I don't care what the people say as long as I got you
'Cause who knows what a love can do

Who knows what a love can do
Who knows what a love can do

Don't care if they knock on me
Ain't no way I can give
The kinda things they want from me
Ain't the way I want to live

We gotta try, try a bit harder
You know we might make it through
And who knows what a love can do

Who knows what a love can do
Who knows what a love can do
