

# Countdown Doom

Biohazard

We speak a different language

But i know you feel the same

We all see the mess we're in

And scream for things to change

Unless the downward path we're on

Takes a different turn

We're destined to repeat the past,

A lesson never learned

We fight for freedom - a call for revolution

They are the problem - we are the solution

Their hypocrisy has enlightened me

The walking contradiction that they claim to be

The puppets promise lies, more lies

The only truth they cant disguise

The silent enemy, the cloaked and shaded

Manipulator, the great negator

Apocalyptic world war looms

Hands of time, countdown doom

Stand up and fight for what you believe

If we don't do something we're all to blame

Bring down the evil corruption and greed

It's always the same game with different names

Don't lose control and give up your freedom - rise up in arms, who the fuck needs 'em

The right to fight is my god given right - don't give up your freedom, rise up and fight

World wide death, no distinctions

Man's destiny is self extinction

The pulse of propaganda, pumping confusion

Oozing chaos through their illusions

Annihilation on its way here

Obliteration of the entire sphere

Is it too late, is all hope lost? - can we stop the next holocaust?
