

Touch the Screen

Birds of Tokyo

When you feel like you coulda been better
And feel like you feel like you could be more this time before

You can share anything that you say
You can read any part in one day
Just so we know

If your bored of being something that ain't special
We can change who in any color unique
Through the filter hide your flawless imperfections
We can re-design perfectly

If I follow you, will you follow me?
If you need to feel
Touch the screen
If I follow you, will you follow me?
If you need to feel
Touch the screen

Could you dream of a love any better?
Put your name up in tiny black letters on the [?]
You could be anyone that you need
You can go anywhere that you read

If your bored of being something that ain't special
We can change who, in any color unique
Through the filter hide your flawless imperfections
We can re-design perfectly
We can re-design perfect me

Every day we take the bait
Click and drag our days away
Everyday there's someone new to be
Everyday we decorate
Preen our feathers, masturbate
Everyday there's someone new to be

If I follow you, will you follow me?
If you need to feel
Touch the screen
If I follow you, will you follow me?
If you need to feel
Touch the screen
