

# When The Morning Comes

## Black Country Communion

Ohh, yeah  
Hmm

You are my long lost relation  
Down in the Wildwood  
From where you came  
Lost in the zone feel your vibration  
Back in my childhood  
I remember your name

In the field out from the gray  
Why did you ever go away?  
I can taste the bitter pill  
Put down the shield  
And Save the day  
In your sorrow, your delay  
I'm on my knees up on the hill

Now at last I wanna say it  
From the mast I do relay it  
When you find yourself  
Under the yellow moon

When the Morning Comes  
When the Morning Comes

Oh, yeah  
Hmm

Down on the line  
I hear the silence  
I carry on  
In Timeless space  
A Little sign  
I need your Guidance  
A memory  
I know this Place

Lilac eyes, you hold my stare  
Such a desperate affair  
In The Valley of the Sun  
I See you walk with such despair  
Fireflies do fill the air  
And don't you know that you're the One?

Now at last I want to say it  
From the mast I do relay it  
When you find yourself  
Under the yellow moon

When the Morning Comes  
When the Morning Comes

I see the mountains they crumble  
Out on the lake  
Voice calling me  
Time to be calm

Time to be humble  
Don't lose your grip  
No Melody

In the field out from the gray  
Why did you ever go away?  
I can taste the bitter pill

Put down the shield  
And Save the Day  
And your sorrow, your delay  
I'm on my knees up on the hill

Now at last I wanna say it  
From the mast I do relay it  
When you find yourself  
Under the yellow moon

And I know you wanna make it  
And I know you won't forsake it  
You gotta live your life  
And I hope to see you soon

When the Morning comes  
When the Morning comes  
When the Morning comes  
When the Morning comes

When the Morning comes  
When the Morning comes

Oh, yeah

When the Morning comes

Ohh

Ohh

When the Morning comes

When the Morning...

When the Morning comes

When the Morning comes
