

My Heart's Pumping

Black Flag

My heart's pumping
My heart's pumping

My heart is built like a tank
It's stainless steel hard as nails ground up my brain
With panic to my chest, don't even bother knocking
You can't touch it, you can't even make a dent

My heart's pumping
My heart's pumping

My heart beats the hell outta time
It's crashing towards the deadline
And the scene of the crime
Lest every fucking [?] jumping [?]
My heart
My heart

Now if you just saw this
No peace when it is wicked
This anxiety is excruciating
I'm going to explode

My heart's pumping
My heart's pumping

My heart is so scarred up
It's robotic, automatic, a view to myself
With self-destructing secret sides and maximum tubes
Imperil, incurable, n' terminally ill

My heart's pumping
My heart's pumping
My heart's pumping
