

## Now Is the Time

Black Flag

I'm losing track of all the time  
And space is just a delusion  
To promise me to paint in between the lines  
And keep me from drawing my own conclusions

But now is the time  
And right now is my time time time  
I said now is your time  
And right now is our time

We are wasting precious time  
And space is occupied-pied-pied  
By the fools who stand in line  
So bare the time, honey, and do the crime son

Because now is the time  
I said now is my time  
But are you looking out?  
What are you waiting for?  
Right now is our time

Is there an outside of the box?  
We're getting stoned and sniffing rocks  
We're getting lost and taking malls  
Abandon ship or he can walk
