

A Love Unreal

Black Label Society

Hand me your doubts, worries and fears
Within this embrace they shall all disappear
A love beyond, a love unreal
The sadness you felt, you will no longer feel

This world and all that there is
I give it to you, all to you
Hand me your love and all that you are
Could you promise me, as I promise you?

Abandoned lies, the uncovered truth
Of who you are and who's of worth
A love beyond, a love unreal
The sadness you felt, you will no longer feel

This world and all that there is
I give it to you, all to you
Hand me your love and all that you are
Could you promise me, as I promise you?

Hear my words
I speak no lies
The dawn of the new
With open eyes

A love beyond, a love unreal
This sadness you felt, you will no longer feel

This world and all that there is a
I give it to you, all to you
Hand me your love and all that you are
Could you promise me, as I promise you?
