

Crystal Night

Black Lips

[Verse 1]

Do you remember?
The snow was falling
And I held you in my arms and we kissed
I think it was November
The very last time

[Chorus]

We never said goodbye
And now I cry
On crystal night

[Verse 2]

Where did they take you?
Where have you gone?
I keep wishing and hoping and praying
But it's been so long
Since the very last time

[Chorus]

We never said goodbye
And now I cry
On crystal night

[Bridge]

I wanna know
Why you had to go
Are you still alive?
You still on my mind

On crystal night
Crystal night
Crystal night
Crystal night

[Verse 3]

Do you remember first time I saw you

I looked into your eyes and I thought
That you were my sugar
Not in this life

[Chorus]

We never said goodbye
Now you're sent to die
On crystal night

[Verse 4]

So while I'm living on this planet
If I don't see you
I'll just wait until the day
That we could meet in heaven
Up in the sky

[Chorus]

And then we'll never cry
Or have to say goodbye

No more crystal night

[Outro]

I wanna know

Why you had to go

I'd like you to tell

Our love never ends

But things just ain't right

Crystal night

Crystal night

Crystal night

Crystal night
