

Lonely

Black Majesty

From the first breath
That we take into this world
That's when our dreams
And inhibitions to soar
So at the crossroads
Of your fantasy and life
Try to reach down deep
Take that dream and make it fly

There's no universe as lonely as me
Try to reach the stars and still might succeed
Do find yourself as lonely as me
Don't give in
Something's coming your way
Something that's real

We might have fallen
Many times had been in doubt
At the end you'll rise
And realise what really matters
So at the crossroads
You'll have dreams to share in life
You have reach down deep
Take that dream and make it fly
