

What Will It Take?

Black Star Riders

What will it take for me to make you smile?
What will it take for me to make you mine?
What will it take can we negotiate?
What will it take? What will it take?

What does it take, does it take more than a lot?
What does it take, does it take more than we got?
What does it take, can we communicate?
What does it take? What does it take?

I think it's gonna take a miracle
To turn this thing around

What will it take?
To change the nothing that we've got
What will it take?
To turn it out to something that we want
What will take?
Before we see the light
What will it take?

What will it take for me to make you see?
What will it take for me to set you free?
What will it take? Can we reciprocate?
What will it take? What will it take?

What does it take to change your point of view?
What does it take to stop this world from being cruel?
What does it take can we cooperate?
What does it take? What will it take?

I think it's gonna take a miracle
To turn this thing around

What will it take?
To change the nothing that we've got
What will it take?
To turn it out to something that we want
What will take?
Before we see the light

They came to wreck it all and ruin our lives
These days only the strong survive
We can't replace all the memories we lost
Why most love and happiness always come at such a cost?

What will it take?
To change the nothing that we've got
What will it take?
To turn it out to something that we want
What will take?
Before we see the light

What will it take?
What will it take?
What will it take?
What will it take?

What will it take? (What will it take?)
What will it take? (What will it take?)
Before we see the light (What will it take?)
What will it take?
