

Nightfall

Black Sun Aeon

Last ray of the light
Sole spark of the sun
Final and so fragile
Travelled from afar

Now standing in a shade
Shadowed by the moon
The eclipse is complete
Dead cold space high above me

[Chorus:]
Embraced by the nightfall
The darkness came to me
Without descent of the sun

Before the flames shall return
And ablaze the sky on fire
I will hide myself
In the shade of the moon

The veil of the night
The sparks of the sun
So vital and fragile
Can't reach this far

Standing in a shade
Shadowed by the moon
Darkness is complete
Dead cold space all around me

I am waiting and yearning
For darkness to remain and prevail
