

Before We Form

Black Tide

You found me broken
A mile deep in hate
Though you're my light in this cryptic life
You've unearthed all my mistakes

I'd destroyed what little life I had
And you gave me something back
Don't let this vicious part of me
Provoke you to retract the gift of your love

You fill the emptiness
The nothingness inside my soul
But when passion flourishes
The demons in us take control

Baby, let's not break before we form (Before we form)
Darling, let's find the strength to weather this storm (Weather
this storm)

I'll no longer be the nightmare
That kept you in despair
I'll go down in flames for you
I'll walk with you in hell

You reminded me we're not alone
We've got something to lean on
The faith I have in us is much too strong
We can make it through this storm

You fill the emptiness
The nothingness inside my soul
But when passion flourishes
The demons in us take control

Baby, let's not break before we form (Before we form)
Darling, let's find the strength to weather this storm (Weather
this storm)

Before we..form!
Baby, let's not break before we form (Before we form)
Darling, let's find the strength to weather this storm (Weather
this storm)
