

Save Our Ship

Blood, Sweat & Tears

The storms that we have weathered
And battled us and bruised us
The wind of change have blown us of our course
The crew stands divided on what course should be decided
And the captain cannot see that we are lost

Save our ship she is slowly sinking
Save our ship or we will surely drown
If there be good men aboard her
Let them sail us to fair Harbor
Save our ship before our ship goes down,
Before our ship goes down

We fought the angry ocean
It seems we had survived her
And now the crew is breaking out the wine
The battle has been decided
But the damage goes unamended
And we're leaking far below the water line

Save our ship, she is slowly sinking
Save our ship, or we will surely drown
If there be good men aboard her
Let them sail us to fair Harbor
Save our ship before our ship goes down,
Before our ship goes down

We can chart our destiny straight and true
And we can turn the stars around
Head for new horizons
But before we do we got to save our ship
Before our ship goes down

Save our ship she is slowly sinking
Save our ship or we will surely drown
Save our ship she is slowly sinking
Save our ship before our ship goes down
