## What If I Lost It

## Bloodsimple

When the time is right you got to get up and fight When your number's up you gotta get up and die

Would you walk five blocks to meet me That skin will get numb

How many times have you been mistreated How many times have you been mislead They brought this nightmare to life All we wanted was to be respected Learned our lessons, and don't you ever forget We stand larger than life What if I lost it

It was said and done but I needed some more, I hadn't had enough, kept kicking in doors

Would you walk five blocks to meet me That skin will get numb

How many times have you been mistreated How many times have you been mislead They brought this nightmare to life All we wanted was to be respected Learned our lessons, and don't you ever forget We stand larger than life What if I lost it

Convicted with no excuse Just pull the trigger, I got nothin' to lose Disputed I will not be locked down Split lipped with nothin' to lose I never really change my point of view Dispute it, the victim is you... I will not be locked down

How many times have you been defeated How many times have you been depressed How many times have you taken the beating How many times have you been put to the test All we wanted was to be respected Learned our lessons, and don't you ever forget We stand larger than life What if I lost it

Would you walk five blocks to meet me That skin will get numb
