

Deserted Alley

Blue Effect

Deserted alley, the brother's watching
there's a gas lamp flickering there
Darkness and light don't stand the changing
It is daily and I can go nowhere

I wish it were summer gale
and you were again with me, with me
Don't let me wait for you in rain
Come and light the town, kiss me, kiss me

That summer I met you at your home
and you guided me through your countryside
I still remember staying far long
How much I love you being by my side

I wish it were summer gale
and you were again with me, with me
Don't let me wait for you in rain
Come and light the town, kiss me, kiss me

Oh....

It was a few days which we were together
but they did teach me in true love believe
We have permission to write a letter
I look out for your heart to love free

I wish it were summer gale
and you were there with me, with me...
