

Last Night I Dreamed

Blues Traveler

It's the part of the dream that leaves me when the sunlight hits my eyes
It's the part of the dream that rolls me over and over as I sleep
It's the part of the dream that leaves me wanting for the darkness
It's the part of the dream I can't remember it at all

I dreamed about you last night
I dreamed about you last night
I dreamed about you last night
Last night I dreamed
Last night last night

Something about a big jet plane moving fast off into the sunset
Maybe a mustang moving fast up to the sky
Mor like a great big boat drifting off to nowhere
I know that in the end you were waiting on the other side

I dreamed about you last night
I dreamed about you last night
I dreamed about you last night
Last night I dreamed
Last night last night

I can feel the dream long before it makes my mind
I know the dream like the scent of the evening air
I need the dream to keep me safe until the morning
When I open my eyes you're there

I dreamed about you last night
I dreamed about you last night
I dreamed about you last night
Last night I dreamed

I dreamed about you last night
I dreamed about you last night
I dreamed about you last night
Last night I dreamed
