

Space Case

Bobaflex

When I was young, I was labeled a space case
So I'd crawl inside my head and I'd find me a safe place
You don't know how it feels, if ya'll need me,
I'll be out in left field

When I was young, I went unsung,
I tried to fit in but the world wouldn't
give in I kept spitting imagination,
frustration builds, desperation kills
Master equip me with the skills I need to fulfill

I need your guidance, I won't be defiant
Gift goes unnoticed, unless you stay focused
I will go stronger, will never wonder
This is the path that I've chosen to take till the end
When I was young I was labeled a space case
So I'd crawl inside my head and I'd find me a safe place
You don't know how it feels, if ya'll need me,
I'll be out in left field
You don't know how it feels

Silent one in the back, they thought he was slow
This child contains a universe, the world may never know
A thinker, his mind actually moved faster
He was able to move the masses with enhanced mental factors

I need your guidance, I won't be defiant
Gift goes unnoticed, unless you stay focused
I will go stronger, will never wonder
This is the path that I've chosen to take till the end
When I was young I was labeled a space case
So I'd crawl inside my head and I'd find me a safe place
You don't know how it feels, if ya'll need me,
I'll be out in left field
You don't know how it feels

You like to think that you can escape,
but precious is the time that you
waste When you're running from your destiny
made ya, my mind ripped,
but I remember your face
