

No but you gotta believe me  
It should've taken the man in green  
He wanted it to be his end  
But it drown the beast out

Theres gotta be a relationship  
Between the water and him  
We gotta drown it out now  
But it could mean death

Face the demon face the death  
Taste the treason face the test  
Kill the master weaken him  
Chase him down now where he treads  
They are calling for what due  
There's no sympathy for you

They will trap you take you down  
They will end you make you drown

No now you gotta believe me  
Theres no other way out of this  
Realization's too painful  
But we don't have a choice  
Drag him into the cove now  
Tie him so he can't escape  
Going into the water  
Until it dies

Come back to me  
Blink if you hear me  
You gotta fight to breathe  
Hold my hand look in my eyes  
The clock within your chest  
Gives back your life

You live in your body  
You live in your soul  
And you live in your heart  
And we live with you  
And now we stand here believers  
A pentagram of black faith  
And now we pity the demons  
And now we march forth that way  
Our darkened ship will sail on now  
Our flag will fly in display  
And we own our strength now  
And with our sword we will reign
