

# Slit My Wrists

**Buckcherry**

What is wrong with you can't we both just get along I see the hesitation in your eyes  
Take me back again maybe we can work it out you know I hate to see you when you cry  
Slit my wrists and I'll just fade away  
The Carolinas where I want to lay  
And if I walk away from here I'll never be the same can't you see it's not about you  
I'm so sick of it, one more fight and all these problems is the y're anything you like  
Have you had enough I'd give my life for one last touch open up  
cause I'm coming in

Late night masquerades, a quiet sea and our devotion, we fall asleep I hold you closer  
Teenage wasteland aren't we crazy now  
I can't carry on don't you know that I still love you we can make it here tonight  
Let's just run away back to everything we live for just let go and close your eyes
