

You Left Me With No Goodbye

Buried In Verona

Move!

Forever you'll remain remembered
Within our hearts as your body decays from this disease
We're all just waves in the ocean, we break but we will remain
My soul is still bleeding as the hope begins to fade
This is something that you can't regret. Everyone is around you
to save you again
I walk the path of shadows as my friends walk through to the gates of hell
This pain feels so hollow
This pain feels so hollow
When you left, you left us behind
You left us behind
My soul (my soul) is still bleeding as the hope begins to fade

This is something that you can't regret. Everyone is around you
to save you again

Now paint the picture but face it down. It's hard to look into
your eyes
I see the demons that took your life away. They took your fucking
life away
