

Before we turn our backs on one another listen up  
I want you more than what I can show  
And you may know my real last name and that I fall  
apart  
But you will never know when I break  
And I was falling from the sky  
Whatever gets you through the night  
You keep your darkest feelings safe inside an armored  
car  
How can I penetrate a lost cause?  
If I let go you'd run away into your mother's  
arms  
Lay down your tired flag at my door  
And I was falling from the sky  
Whatever gets you through the night  
All that is and all that guides me  
I will follow through  
And if there's an answer inside me  
I will find that too  
I will live like a stepchild cause my feelings are  
brand new  
And now I'm gonna come unglued  
A final kiss  
A telegraph of what I'll do to you  
I will reek havoc on your sick heart  
A farewell kill  
A soft goodbye and then we'll never know  
Protect me from all harm and let go  
And I was falling from the sky  
Whatever gets you through the night  
All that is and all that guides me  
I will follow through  
And if there's an answer inside me  
I will find that too  
I will live like a stepchild cause my feelings are  
brand new  
And now I'm gonna come unglued
