

## The World Is Dead

Call Me No One

The day runs out - what's left of us now  
Why don't you say what you mean  
Force feed the lie and believe  
That blood is ours and it's everywhere

The whole world is dead  
The world is dead

It's all yours now - save face -bow down  
Why don't you cover your scream  
Change something real and we'll see  
That life you fake died so easily

The whole world is dead  
The world is dead
