

Whatever Happened

Call Me No One

Slow day the end has come
Eliminate the walls that keep you blocked in
Drag the words and scrape the skin
You're never done but don't know where it began

Grace won't save you
Nothing ever goes that way
Whatever happened to you
Make your way
Back to the beginning
Whatever happened to you

Slow pace the choice is made
Can't navigate the path you always dread
Cut the cord and release yourself
The day is gone but you fall down
