

And I know right now you're broken,  
But this world will turn itself around again.  
And I love that you keep jokin',  
But if you fall apart I'll be here just the same.

And I know, this life could be much more  
If you keep your heart forward  
And show her where you're calloused and you're scarred.  
And I know, this life could be much more  
If you keep your heart toward her  
And let her in before you go too far.

I know you hate this part,  
But nothing's ever easy from the start.  
Love let go, it'll be OK,  
And if not I'll hold you as long as it takes.

And I know, this life could be much more  
If you keep your heart forward  
And show her where you're calloused and you're scarred.  
And I know, this life could be much more  
If you keep your heart toward her  
And let her in before you go too far.

And you could set me free.  
And you could let me be what I was meant to be.

And I know I could hold you the right way.  
Lean my head into your chest and peer inside.  
And you should know, your heart exposed  
Is the most beautiful thing I've ever known.

And I know, this life could be much more  
If you keep your heart forward  
And show her where you're calloused and you're scarred.  
And I know, this life could be much more  
If you keep your heart toward her  
And let her in before you go too far.
