

## Used To This

Camila Cabello

No, I never liked San Francisco  
Never thought it was nothing special  
Till you kissed me there  
No, I never liked windy cities  
But I think maybe when you're with me  
I like everywhere

It's the strangest feeling  
Midnight, I'm not leaving  
No, for once, I think I'll stay  
I say your name, just listen  
Doesn't it sound different  
Never whispered it this way

It's gonna take me a minute  
But I could get used to this  
The feeling of your fingertips  
The feeling of another kiss  
It's gonna take me a minute  
But I could get used to this  
Like every tattoo on your skin  
I'm memorizing every inch  
I could get used to this  
I could get used to this  
Definitely

No, I never did like tequila  
But there's something about when I see ya  
Think I need a drink  
And the callouses on your fingers  
I admire them from a distance  
Now they're on my cheek

Oh, I've known you forever  
Now I know you better  
Let's just get carried away, oh  
And it bears repeating  
How hard my heart's beating  
When you tell me I should stay

It's gonna take me a minute  
But I could get used to this  
The feeling of your fingertips  
The feeling of another kiss  
It's gonna take me a minute  
But I could get used to this  
Like every tattoo on your skin  
I'm memorizing every inch  
I could get used to this  
Definitely

No, I never liked San Francisco  
Never thought it was nothing special  
Till you kissed me there

It's gonna take me a minute  
But I could get used to this  
The feeling of your fingertips  
The feeling of another kiss  
It's gonna take me a minute  
But I could get used to this  
Like every tattoo on your skin  
I'm memorizing every inch  
I could get used to this

I feel it all (I could get used to this)  
Your kisses, oh, I'll risk it all  
Seventeen when we started to fall (I could get used to this)  
But we lost it all  
And I just can't believe it all (I could get used to this)  
Definitely
