

Disintegration  
Miles from the coast  
Working towards something  
Hand shake the ghost  
Plagued by the intrigue  
Stock on the line  
Hungry generation  
Eye for an eye

Satellites are broken down inside my mind  
Jealousy is burning holes into my eyes

Disintegration  
Punch clock the time  
Working towards something  
Blindfold the eye  
Respect the work horse  
Done what was told  
Hungry generation  
Left dead in the cold

Satellites are broken down inside my mind  
Jealousy is burning holes into my eyes

If you can change change what you can  
If you can't then hold on for dear life  
If you can change change what you can  
If you can't then let it go let it go  
Looking back on all the moments we waste  
Wasted moments on what we can't take back  
Moving further getting caught in the race  
Racing further from what we can't fix now  
If you can change change what you can  
If you can't then let it go

Satellites are broken down inside my mind  
Jealousy is burning holes into my eyes

Disintegration  
Sums of the fears  
Working towards something  
Wrench in the gears  
Confront the action  
Disgust the self  
Hungry generation  
That's working for them and nobody else
