

Hope Springs Eternal

Capercaillie

To reach the constellations and pacify the world
It's all we ever wanted from this cavalcade of spoils
But faking this democracy and shaking hands as one
When all is said and all is done, it doesn't change a thing

There's a burden on those people like the seas of Calcapone
Just a little misunderstanding from the days of kings and fairy
tales
And every time the future seems to tinker on the brink
Of clearing all the scum, you know it doesn't change a thing

But hope springs eternal in every child and every doorway
I can't wait now to see your time coming 'round
Hope springs eternal in every grain of every sand dune

In a DJ revolution, music makes the world
A soundtrack for the people who it makes them feel at home
And hanging in the city where the neon tells the time, you know
Everyone can see it now, it doesn't change a thing

Hope springs eternal in every child and every doorway
I can't wait now to see your time coming 'round
Hope springs eternal in every grain of every sand dune

Hope springs eternal in every child and every doorway
I can't wait now to see your time coming 'round
Hope springs eternal in every grain of every sand dune
