

# Where The Light Dies

Carnifex

All you are to me is a faded memory  
Trust me when I say  
I'm alone in these dreams

Keep your eyes on my hands  
And watch in the mirror  
And barely understand

I don't want to know when you let your innocence go  
When the nightmares took hold  
I don't want to know when you let your innocence go  
Choke the life from me until my body goes cold

I used to write down every lie you spoke to me  
Now I know that pained my memory  
I used to write down every lie you spoke to me  
Now I know that pained my memory

Find me lying on the floor  
With no life left in my eyes

Find me dreaming of the end  
With no one by my side

Find me screaming goodbye (goodbye)  
Find me where the light dies

There is no air to breathe  
Only blood in my lungs  
This time we all die alone

Say your prayers and say goodnight  
One last breath before we all die

See the world through my eyes  
Everything you love fucking dies

It's raining acid, I'm waiting to die  
You're just a memory buried alive

Put the gun to my head  
I won't feel the pain, I'm already dead

All you are to me is a faded memory  
Trust me when I say  
I'm alone in these dreams

Keep your eyes on my hands  
And watch in the mirror  
And barely understand

Find me lying on the floor  
With no life left in my eyes

Find me dreaming of the end  
With no one by my side

Find me screaming goodbye (goodbye)  
Find me where the light dies

Dies!

See the world through my eyes  
Everything you love fucking dies  
See the world through my eyes  
True love is a fucking lie
