College Years

Casey Donahew Band

It wasn't easy, but somehow I fit
Four long years of college into six
I pulled some bad grades, but made some good friends
For my lack of education I still blame them

We were young, life was good Now I'd go back and do it all again if I could We had time and we had beer And that's all we needed in those college years

I had a buddy, who found me an ID

Man that picture didn't look a damn thing like me

We had a few nights, we had too much fun

We got empty balls and then got luck we had them

We were young, life was good Now I'd go back and do it all again if I could We had time and we had beer And that's all we needed in those college years

I had a guitar, I couldn't play it
But when everybody got drunk I could fake it
I had a girlfriend, and she was older
And she taught me things and to this day I thank her

We were young, life was good

Now I'd go back and do it all again if I could

We had time and we had beer

And that's all we needed in those college years

Yeah that's all we needed in those college years
