

# Rotting Children for Remote Viewing

## Cattle Decapitation

Observe the opened thorax  
Cracked sternum revealing respiratory and cardiac landscapes  
For the viewing by zombified children  
Olfactory overload from the stench of life  
Superior to the abdominals  
Inferior to anesthetized cortex  
Reverberating timbres of the cracking thoracic  
As if peeling melted duct tape

Stimulus - transmission  
Reaction - desensitized

Prodded visceral lining  
Slice through the fascia  
To view the surging capillaries  
Too much for the rotting innocent  
Vomit in the sterile cavity  
Days old chime brews to fuming combustion  
Exploding the contents - releasing the rot stench  
Remotely viewing the depravity of homo-sapiens

Transcend your consciousness  
To this very existence  
Through the eyes of dead children  
Rich soil now tainted

And I see humanity  
And I see a pool of blood  
And I see your molding cadaver  
And I see you dead

Pancreas, kidneys, lungs, liver, intestines  
Segments of traced epidermis-dividing its sections  
Unknowingly kept alive-demoralized!  
In the presence of rotted children
