

## Generation of Flies

Centinex

A truncated cadaver located on a jetty  
The body was discovered early in the morning  
It tells the story of very serious violence  
Shoe prints everywhere in the mud  
Four feet, one adult, one child

A new generation of flies

Someone is kidnapping homeless people  
Torture them so bad that they soon die  
Zipper down, opening the bag of plastic  
The acrid scent hurts passing through the nose  
After a long time floating in the balmy water  
Body fats turned into a rancid smelling paste  
Resembling look and texture as white defecation

A new generation of flies

The body has been lying in the reeds  
Hidden for three weeks, badly damaged  
The epidermis on the hands and feet  
Had absorbed so much water  
It comes off as socks and gloves  
They pupate to become a new generation of flies

Bodies lying in water transform  
Flies are gathered infesting the body  
Head and legs and arms pointing downwards  
Torso with the legs bent in the hip joints  
Yellow Red grains around the eyes and nose and mouth  
Flyblows develop into larvae  
Drilling deep into the soft tissues to feed  
Pupate to become a new generation of flies

A new generation of flies

They pupate to become a new generation of flies
