

How Much I Love You

The Charlie Daniels Band

Lady it's just your style, the way you close your eyes and smile

When I hold you close and kiss you
The way you touch my hand, you always seem to understand
And when you're gone how much I miss you

Just being with you makes me high
That lovin' look that's in your eyes
Makes me stop and realize
How very much I love you

The special little things you do every morning waking up with you
Makes me want to live forever
We'll take whatever comes our way
If it's sunshine or rainy days,
Just as long as we're together

Thanks for being my best friend
Even if the world should end
And know you always can depend on
How very much I love you

I can't count the times I depended on you
You're all that keeps me in control
You are the melody heaven sent for me
You are the music of my soul

Every night I close my eyes, turn my face up toward the sky
And thank the good Lord that I found you
I know that there could never be, anybody else for me
And I just want to make you see how very much I love you
