

# Boogie Woogie Fiddle Country Blues

Charlie Daniels

Every time I hear a fiddle  
and it's cookin' just a little  
well it makes me want to jump up and run  
And if he's sawing with some  
soul boogie woogie rock 'n roll  
well I know I'm gonna have some fun  
And when the rosin starts to fly  
and I'm lookin' in the eye  
like I'm just about to blow a fuse  
Mama call the doctor  
'cause your boy has got  
the rocking Boogie Woogie  
Fiddle Country Blues

I met a man from Tennessee  
this is what he said to me  
He said "Music is a rhapsody"  
He picked up his violin  
stuck it underneath his chin  
and started playing me a symphony  
I said "That ain't the way it's done  
let me see that fiddle, son"  
and I sawed him off a chorus or two  
He said you'd better call the doctor  
'cause I think you've got  
the rocking Boogie Woogie  
Fiddle Country Blues

Now if you want to play me some fiddle  
I'll tell you right from the start  
You'd better play me something  
lowdown hoedown honking  
I don't want to hear no funeral march  
It's got to pick me up and roll me over  
it's got to make me want to jump up and sing  
If it ain't buzzing like a beehive  
kick it into overdrive  
or it don't mean a doggone thing

So let me rosin up my bow and  
I think that I can show you  
the way I like to play this thing  
Let's put some boogie rhythm in it  
kick it on up to the limit  
I'm gonna put some fire on these strings  
And if you feel your feet start moving to the beat  
and you feel like you've got ants in your shoes  
Well you'd better call the doctor  
'cause you've probably got  
the rocking Boogie Woogie  
Fiddle Country Blues

I said you'd better call the doctor  
'cause you've probably got  
the rocking Boogie Woogie  
Fiddle Country Blues
