

# Play Me Some Fiddle

Charlie Daniels

Every time I hear a fiddle and it's cookin' just a little  
Well, it makes me want to jump up and run  
And if he's sawing with some soul boogie woogie rock 'n' roll  
Well, I know I'm gonna have some fun

And when the rosin' starts to fly and I'm lookin' in the eye  
Like I'm just about to blow a fuse  
Mama, call the doctor 'cause your boy has got  
The rocking boogie woogie fiddle country blues

I met a man from Tennessee, this is what he said to me  
He said, "Music is a rhapsody"  
He picked up his violin, stuck it underneath his chin  
And started playing me a symphony

I said, "That ain't the way it's done, let me see that fiddle s  
on  
And I sawed him off a chorus or two"  
He said, "You'd better call the doctor 'cause I think I've got  
The rocking boogie woogie fiddle country blues"

Now if you want to play me some fiddle  
I'll tell you right from the start  
You'd better play me something lowdown hoedown honking  
I don't want to hear no funeral march

It's got to pick me up and roll me over  
It's got to make me want to jump up and sing  
If it ain't buzzing like a beehive, kick it into overdrive  
Or it don't mean a doggone thing

So let me rosin' up my bow and I think that I can show you  
The way I like to play this thing  
Let's put some boogie rhythm in it, kick it on up to the limit  
I'm gonna put some fire on these strings

And if you feel your feet start moving to the beat  
And you feel like you've got ants in your shoes  
Well you'd better call the doctor 'cause you've probably got  
The rocking boogie woogie fiddle country blues
