

I Think Of You

Charlotte Martin

I think of you
With all my second thought
I think of you
The thought could and go
I think of you
I think of you

I dream of you
When i just close and eye
And think of you
The times you see when blind
I see for you
I think of you

And all i ever wanted
Was all i ever needed
And every time i look at you
I know that you're the man
Who could love me like no other
And hate me like no other
And want to see this face
Look into you forever

You love me like a woman
Need me like a habit
Every time you stare at me
You know that i'm the girl
Who could care enough for you
To let you go

I needed you
The men behind your eyes
You need me too
Believe in all your lies
I see in you
I'm watching you

And i think of you
When every sun melts down
I think of you
When winter freezes ground
I see for you
I think of you

And all i ever wanted
Was all i always needed
And every time i look at you
I know that you're the man
Who could love me like no other
And hurt me like no other
You want to see my face look into you forever

You love me like a woman
Need me like a habit
And every time you look at me
You know that i'm the girl
Who could care enough for you

To let you go

I think of you
I'm waiting to
To see if you
Could love me forever and ever

Oh and all i ever wanted
Was all i always needed
And every time i look at you
I know that you're the man
Who could own me like no other
And kill me like no other
You want to see the face look into you forever

You love me like a woman
And need me like a habit
And every time you look at me
You know that i'm the girl
Who could care enough for you
To let you go
