

## About You

## Chemistry

I finally felt alive when you said you'd be here before long  
You know I cannot wait  
I tried to make the best of my lack of things to do  
Now all I need is you

I wish our distance would disappear  
You gotta know that I want you and I need you here  
I wish our distance would disappear  
You gotta know that I want you and I need you here

The thought of you reminded me of what I've been missing  
I'm dying to see you  
The phone can only do so much  
I need to feel your touch  
So don't make me wait

I wish our distance would disappear  
You gotta know that I want you and I need you here  
I wish our distance would disappear  
You gotta know that I want you and I need you here

I think of you when I'm alone  
I think of you when I'm afraid  
I think of you everyday

I think of you when I'm alone  
I think of you when I'm afraid  
I think of you everyday

I think of you when I'm alone  
I think of you when I'm afraid  
I think of you everyday

I think of you when I'm awake  
I think of you when I'm afraid  
I think of you everyday

I think of you when I'm awake  
I think of you when I'm with her  
I think of you everyday

I wish our distance would disappear  
You gotta know that I want you and I need you here  
I wish our distance would disappear  
You gotta know that I want you and I need you here  
I wish our distance would disappear  
You gotta know that I want you and I need you here  
I wish our distance would disappear.
