

When Will My Lover Come Around

Chris Cagle

When will my lover come around, come around?
When will my lover come around?

I got a feeling she might skip town,
She might had enough of me, said I'm never gonna settle down.
But I thought she'd be back by now
But I'd been sitting out here on the front steps
All afternoon, smoking cigarettes and wondering

When will my lover come around, come around?
When will my lover come around?

Let the river run dry, let the mountains fall
'cause I will be right here 'till she comes back home.

I got a feeling something ain't right
I ain't heard a word from her and it's almost midnight.
I guess I'll have to put out that porchlight
So the first thing that she sees is me sitting out here and wondering

When will my lover come around, come around?
When will my lover come around?
When will my lover come around, come around?
When will my lover come around?
