

# Untold Dreams

## Circle II Circle

Down and out  
Cold and drowned  
Feeling tortured  
A man within  
But not without  
My misfortune  
Ran enough  
To get this far  
But my days are numbered  
Far enough to tempt the gods  
I hear the thunder  
How I got here I don't know  
There's a reason  
That I'll always be  
Alone

You never knew this  
I lead a double life  
Let me introduce you  
To my other side  
I'm on the neon streets  
Out there selling disease  
If you live or die  
It means nothing to me  
I don't wanna go away  
But I can't face the light of day

Out of darkness  
And into the night  
As a life has turned so cold  
Frozen in fear I've taken a life  
A body without a soul  
Running away from the midnight sun  
Blinded while I scream  
Nothing left to save me from  
The war of untold dreams

I didn't want this  
But you left me no choice  
A man with no voice  
And suicide  
Is a friend of mine  
It's always there is I ever decide

I keep climbing all the way  
I see the mountain miles away

Out of darkness  
And into the night  
As a life has turned so cold  
Frozen in fear I've taken a life  
A body without a soul  
Running away from the midnight sun  
Blinded while I scream  
Crying out but the tears don't come  
In the war of untold dreams

Out of darkness  
And into the night  
As a life has turned so cold  
Frozen in fear I've taken a life  
A body without a soul  
Running away from the midnight sun  
Blinded while I scream  
Nothing left to save me from  
The war of untold dreams
