

I'm Sick of It

City Lights

I'm sick of it

Everyone acting like they know us
When there's so much more beneath the surface
You've got some predetermined opinion
About our goals and our agenda

Well, let me tell you a thing or two

We've been around the block a few times
Don't you try to tell us we've been doing everything wrong
We've been on the grind, punk rock kids since '99
We've been around. I'm sick of it

Everyone taking themselves so seriously
What makes you so damn special
Is this really what this scene has become
One big undeserved sense of accomplishment

Let me tell you a thing or two

We've been around the block a few times
Don't you try to tell us we've been doing everything wrong
We've been on the grind, punk rock kids since '99
We've been around

Now let me ask you a question

Where do you get off
Telling us that we don't have the right
To do what we wanna do
We are the resistance
And we're taking a stand for ourselves
We're not letting you get us down

We're not letting you get us down

Let me tell you a thing or two

We've been around the block a few times
Don't you try to tell us we've been doing everything wrong
We've been on the grind, punk rock kids since '99
We've been around

We've been around the block a few times
Don't you try to tell us we've been doing everything wrong
We've been on the grind, punk rock kids since '99
We've been around (we've been around)
