

Where We Started

City Lights

I don't think
That I am ready
To let this all go caving in
My mind is heavy now
And I'm wondering
If I can make it out

If you are struggling like me
Just give me a sign
To let me see
And we'll run away
What would it take
To make you a promise
That in time we'll get
Back to where we started
Days could never be wasted
But the summer we spent
I could never replace it

I can't move
When I feel helpless
It's like my bones
Are glued to the street
My nerves are broken down
Can we fix mistakes
And forget the past

Are you un-whole
Without me
Cause when I'm alone
It's like a disease
So take care of me

When you find
That the sparkle in your eye
Has faded to grey
Realize all the pain inside
Can all be taken away
