

Music Sounds Better With You

Claude Kelly

The music sounds better with you (3x)

There's a feeling, that I can't describe
Like a cool wind, when I'm by your side
I can feel you all over my skin
I can't help it, gotta let you in
And everything around, starts to disappear
All that I see now, is you and me
I'm not the type that falls, not this easily
But somehow you got, got the best of me

[Chorus:]

People everywhere in this crowded room
Baby I can't help, staring' back at you
Got a single breath, my control I lose
Because the music sounds better with you
Nothing can come between us tonight
When I'm with you I'm feeling so right
It's an other night you gone change your moves
Because the music sounds better with you

It's like your reading, my deep and darkest thoughts
Like you seeing straight into my heart
How could you know, that it wasn't me
How did you make the music sounds so sweet
And everything around, starts to disappear
All that I see now, is you and me
I'm not the type that falls, not this easily
But somehow you got the best of me

[Chorus:]

People everywhere in this crowded room
Baby I can't help, staring' back at you
Got a single breath, my control I lose
Because the music sounds better with you
Nothing can come between us tonight
When I'm with you I'm feeling so right
It's an other night you gone change your moves
Because the music sounds better with you

You make it all just comes to life
Like I'm here in for the first time
Don't know how you got me so hypnotized
But I'm totally lost in the moment
With every touch I become more alive

Because the music sounds better with you
The music sounds better with you
The music sounds better

[Chorus:]

People everywhere in this crowded room
Baby I can't help, staring' back at you
Got a single breath, my control I lose
Because the music sounds better with you
Nothing can come between us tonight
When I'm with you I'm feeling so right

It's an other night you gone change your moves
Because the music sounds better with you

The music sounds better with you
Because the music sounds better with you
