I do believe my eyes are telling me lies I saw a ship ashore, a baked apple pie Hide in corners and climbing up trees Love is a big ship, following me

Big ship, following me Love is a big ship, following me

Some like it cool, some like it hot You see me cool, like a fool, with all the lovin' I got Passing the world and the world's passing me Love is a big ship, following me

Big ship, following me Love is a big ship, following me

Just like, just like a big ship Just like, just like a big ship Just like, just like a big ship Following me, following me

Make me feel good, while you're shakin' me down Singers are singing dubidu all the town Dubiduda, singing dubidudi Love is a big ship, following me

Make me feel good, while you're shakin' me down Singers are singing dubidu all the town Dubiduda, singing dubidudi Love is a big ship, following me

Big ship, following me Love is a big ship, following me

Just like, just like a big ship Just like, just like a big ship Just like, just like a big ship Following me, following me Following me, following me
