

Wolves

Coasts

I'll drag you out when you're sleeping
Skip through the streets til the weekend
The trees are stop breathing, our fears alive

And now we're holding on
the moonlight comes between us
Got to let it go
let it go tonight

We're out of the woods
we're running with wolves
Into the wild again
We'll never be tamed
We're singing out
Running around
I'll figure it out
Running around
Running around with wolves

Our lungs are burned but we're frozen
So wrap your arms around my shoulders
Just skin in and bones in the end
Two worlds collide

And now we're holding on
the moonlight comes between us
Got to let it go
let it go tonight

We're out of the woods
we're running with wolves
Into the wild again
We'll never be tamed
We're singing out
running around
I'll figure it out
Running around
Running around with wolves
We're running around with wolves

We're out of the woods
we're running with wolves
Into the wild again
We'll never be tamed
We're singing out
Running around
I'll figure it out
Running around
Running around with wolves
