

# Snowblind

Cold

Already in this all the way  
I need to medicate  
I can't breathe and  
It's cold now  
Hid the sun that keeps  
Me warm  
Ready the stars I'm on my way  
A steady resolve complete  
It Keeps killing me softly  
And it feels just like it's love

I'll go in all the way  
Snowblinded  
Search for you everyday  
Snowblinded

Already in this all the way  
I need to separate  
I can't breathe and it's cold now  
By the summer I'll be home  
Line up to carry me away  
A misfit, a memory  
It keeps killing me softly  
And it feels just like it's love

Play the music loud  
My life is almost gone  
Needed to hide away  
The darkness stole the sun  
When I needed to see beautiful  
I will see you standing there  
It's like god supplied the novocaine  
And the devil took away my will
